
2021 State of Patent Practice- A Patent Law Wrap Up

Webinar
12.09.2021

Volpe Koenig ends the year with a CLE webinar looking back on some of the most important patent cases of 2021 and their impact on the patent practitioner. Starting with a broad, statistical overview of 2021, the presenters will expand on patent trends and filing analytics, as well as litigation developments. Taking a closer examination at several precedential and pivotal cases, the presenters will provide analysis on cases involving Section 101 developments, assignments, design patents, indefiniteness, and inequitable conduct.

Looking forward to 2022, attendees will gain an understanding of emerging intellectual property trends in areas such as AI inventorship, COVID patent issues, and patenting fintech and blockchain technology.

Thursday, December 9, 2021, 1 p.m. EST
