# ANDA Litigation

---

Volpe Koenig's ANDA Team comprises highly specialized legal professionals with an in-depth knowledge of all aspects of pharmaceutical product life-cycle, including product design, development, and clearance. The Team also assists its clients in the licensing of various scientific technologies in the pharmaceutical industry. Members of this Team have counseled pharmaceutical clients during the development phase of hundreds of products including the patenting of new technologies and designing around existing patents.

Led by an intellectual property attorney with more than 30 years' experience in pharmaceutical litigation, the well-rounded Team also includes legal professionals with PhDs in life sciences disciplines, other advanced scientific degrees, as well as real-world research, academic and industry experience.

Members of this Team have obtained numerous favorable client settlements in major patent infringement suits around the world, and have significant experience with pharmaceutical litigation in U.S. district courts, including the District of New Jersey and District of Delaware, which have become significant venues for pharmaceutical litigation in recent years.
